I am an enthusiastic software engineer with 2+ years of experience in building software, eager to contribute to team success through hard work, attention to detail, and excellent organizational skills. I thrive on building software applications that surpass users' expectations. Motivated to learn, keep growing, and excel in software engineering.

With frontend development as my focus and Javascript as my proficient tool, my experiences have been centered around working on products, small to large scale which have grown businesses efficaciously.

Technical Skills

- JavaScript
- TypeScript
- Vue.js, Nuxt.js
- React.js, Next.js
- CSS, SASS & TailwindCSS

Experience

JUNE 2021 - PRESENT

Acumen Digital, Lagos, Nigeria - Software Developer (Full time)

- Collaborated with the team in building a chat application with pluggable SDKs which has successfully delivered over a million messages and satisfied its clients.
- Building and maintaining functional & user-friendly applications using standard technologies which are fully integrated with APIs.
- Building and contributing to projects most of which fall under fintech, legal-tech, and e-commerce.
- I have been outsourced to work on contracts for local and foreign-based companies.
- Spearheading frontend projects from its foundation to finish.
- Rendering help to fellow software developers, and developer interns where needed.

MARCH 2021 - JUNE 2021

Acumen Digital, Lagos, Nigeria - Software Developer Intern

- I collaborated with the team in planning out and building a web application that utilized Google's Embedded Map, Direction & Geolocation APIs to track, update and provide directions to a client's map location.
- I worked with senior engineers to build an online marketplace application that helps professionals find jobs, communicate with clients, and get paid.
- I built responsive and functional web applications using standard web technologies which are fully integrated with APIs.

- I learned the fundamentals of working with a team to plan out, build and deploy fully functional web applications where we worked with version control, and tools like Asana, Jira, and Github for collaboration.
- I worked with senior engineers and delivered tasks in time and which helped in honing my skill.
